# Drying

OPTICS, JEWELLERY,  
LUXURY PARTS,  
GALVANIC TREATMENT...

The water can be a very difficult pollutant to eliminate, because of the spot that can stay in the parts.

ADD TO THIS, THE OTHER CONSTRAINTS LIKE, BIG GROUND SPACE BECAUSE OF THE SIZE OF MACHINES, HOW NOT TO AFFECT MATERIALS AND MONITOR YOUR PROCESS ?

- ✓ NEED TO DRY FAST
- ✓ NEED A HIGH PURITY WATER (DI WATER OR DISTILLED WATER)
- ✓ COMPLEX GEOMETRY OF THE PARTS
- ✓ TEMPERATURE ISSUES
- ✓ SPOT FREE
- ✓ HIGH PRICE FOR DI OR DISTILLED WATER
- ✓ FLAMMABILITY IF USE OF SOME QUICK DRY PRODUCTS (IPA)

Inventec is the only expert in the market, offering this technology of « Spot Free\* » Drying.

TYPE OF POLLUTANT	TYPE OF PROCESS	SOLUTIONS
Water	VAPOUR PHASE DRYING	<ul style="list-style-type: none"> <li>● Promosolv™ DS1</li> <li>● Promosolv™ DS2</li> </ul>
	DEWATERING	<ul style="list-style-type: none"> <li>● Topklean™ MC105</li> <li>● Topklean™ MC10</li> <li>+ Rinsing with</li> <li>● Promosolv™ IPA</li> </ul>

Non-exhaustive list. INVENTEC assists you in the study of the compatibility of pollutants with the product and in the process definition adapted to your need.
